

ARE MY DEVICES SPYING ON ME? Living in a world of ubiquitous computing

A free Public Presentation
by
Jason Hong, Ph.D.

DATE: Tuesday, Feb. 26 2019

TIME: 7:30 - 9:00 pm

WHERE: ATAC 1003

Refreshments served

In the near future, our smart devices will know almost everything about us. In this talk Dr. Hong will discuss how our devices work, what they can learn about us, what information they can share, and what we can do so this sharing of information is to our benefit. Dr. Hong is Professor in the Human Computer Interaction Institute at Carnegie Mellon University, He has been involved in developing anti-phishing technologies, smartphone privacy, and cybersecurity. His work has appeared on CNN, CNBC, and the NY Times. He is a co-founder of Wombat Security technologies and the recipient of numerous awards.
